VSQG CERTIFICATION FORM

In order to certify your generator status and dispose of your waste, we are requesting that you sign the following statement:

I certify that my business generates hazardous waste, and because of the small volume of hazardous waste my business generates and/or stores, it qualifies for Very Small Quantity Generator (VSQG) status. I understand that to qualify for VSQG status, my business must meet both of the following conditions (as defined by 40 CFR section 261.5):

1. Generate less than 100 kg per month (220 lbs) of hazardous waste per month and never store more than 1000 kg (2200 lbs) on site at any time.
2. Generate less than 1 kg per month (2.2 lbs) of acute hazardous waste and never store more than this amount on site at any one time.

I further understand that if in the future my business exceeds the quantity limitations described above, it will become subject to additional regulation as hazardous waste generator and will no longer be eligible to participate in this type of collection program. In addition, I understand that Depot personnel have the option of visiting my business to assess my hazardous waste, should any questions arise.

I, the undersigned, have read the above statements and understand the conditions and provisions that apply to the use of the Marshall County Solid Waste Management District/Recycle Depot.
